

Product Catalogue

Global organizations focus on increasing the safety of the people. Accordingly, our company offers a new generation of electrical safety connections and ensures the highest level of safety of the people and machines against electric hazards.

All our products are designed to ensure the safety of the electrical transmission process, in order to avoid the negative impact of common actions that can be very dangerous.

PluGuard Family

A revolution in your electrical safety system

PG-LINK

PG-SOCKET

PG-MULTI

PG-EXTEND

PG-LINK

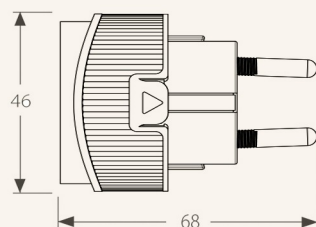

PG-LINK is designed in a small, modern shape and every detail is etched with precision.

It is equipped with “MAGNA-force” the unique patented technology that prevents any plug from being removed accidentally and makes sure that the plug is well fitted throughout usage

Portable

A small size and elegant design that fits comfortably in your hand making PG-LINK easy to use. Its miniature dimensions and unusual lightness allow you to take it everywhere.

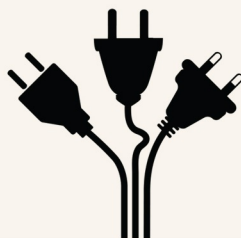

Plug&Play

As no tools needed, adults can install and remove the PG-LINK as easy as 1,2,3. Further PG-LINK does not affect the socket or the plug.

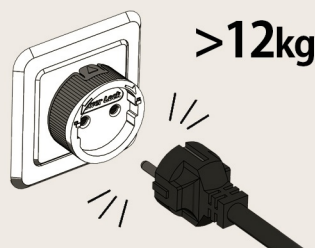

Universal

PG-LINK fits all shapes and standards of electric sockets types (C), (F) and (C-A). Further, it can fix all corresponding power plugs, chargers and large adapters.

Auto-Release

To ensure a reliable attachment and prevent the cord from being torn. MAGNA-force will automatically release the plug when the pulling force exceeds 12kg.

Tamper Resistant

Installing and locking the PG-LINK in the wall socket will completely block the outlet openings to prevent insertion of any metallic object or electric plug therein.

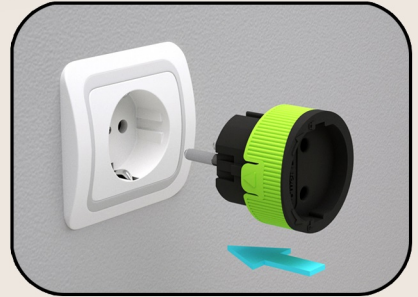

PG-LINK

Plug Fixation

1-

Set the **PG-LINK** in the “UNLOCK” position

2-
